WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/F12004/050176

Bo	x No. I	Basis of this opinion
i.	which it	ard to the language, this opinion has been established on the basis of the international application in the language in was filed, unless otherwise indicated under this item. his opinion has been established on the basis of a translation from the original language into the following language, which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).
2.	claimed	ard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the invention, this opinion has been established on the basis of: of material a sequence listing table(s) related to the sequence listing
	b. forma	t of material in written format in computer readable form
	c. time	of filing/furnishing contained in the international application as filed. filed together with the international application in computer readable form. furnished subsequently to this Authority for the purposes of search.
3.		In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
4.	Addition -	al comments:

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/FI2004/050176

. Statement			
Novelty (N)	Claims	2-6, 9-14	YES
	Claims	1, 8, 15	NO
Inventive step (IS).	Claims		YES
	Claims	1-15	NO
Industrial applicability (IA)	Claims	1-15	YES
	Claims		NO

2. Citations and explanations:

The claimed invention solves problems caused by electrostatic discharges in the vicinity of semiconductor components. The suggested solution is to provide the component with a grounded conductive element.

Documents cited in the International Search Report:

D1: US 4796084 A D2: US 2001033478 A1 D3: JP 2001196638 A

D1 discloses a semiconductor device with protection against electrostatic discharges. The protection comprises a conducting film, which may be grounded (see claims 1-2).

In D2 another electric component provided with a grounded shield is disclosed.

D3 shows a grounded conductive loop (5) surrounding an LED.

The invention according to independent claims 1, 8 and 15 is known from D1.

The further details added in claims 2-7 and 9-14 are not explicit in D1. However, these details and their effects are well known by the person skilled in the art and do not contribute to any surprising solution of any technical problem. Thus, the invention according to these claims is not considered to involve an inventive step.
